LAST SAD RITES.

Funeral of the Late Frank S. Pratt on Sunday.

The body of the late Frank S. Pratt was conveyed from the residence on Punchbowl street, in a beautiful coffin, to St. Andrew's Cathedral at 2:30 o'clock yesterday afternoon. As the hearse entered the Cathedral grounds the Hawai-ian National Band played a solemn march. Rev. Alex. Mackintosh stood at the church door and led the procession to the chancel and conducted the services throughout. The choir of the Second Congregation sang two hymns, terminating the services with singing "Days and moments quickly flying." As the coffin was borne to the hearse Wray Taylor, organist, played Handel's "Dead March in Saul."

Precisely at 3:30 o'clock the fun-eral procession, headed by the Ha-waiian National Band in white uniform, moved off for the Nuuanu Cemetery, where the interment took place. Succeeding the band was a wagonette in which were the pallbearers: W. G. Irwin, W. Foster, H. A. Widemann, W. F. Allen, G. J. Ross, J. O. Carter, Judge Whiting, A. S. Cleghorn and Godfrey Brown. Rev. Alex. Mackintosh preceded the hearse, which was followed by Mrs. Pratt, widow of the deceased, and adopted daughter. About thirty-two carriages followed the hearse to the cemetery. Native kahili bearers walked on each side of the hearse. Rev. Alex. Mackintosh conducted services at the grave, and at the con-clusion the band played, "There's a land." Major Seward had charge of the funeral. There were many floral contributions.

THE UNDERSIGNED HAVE BEEN APPOINTED SOLE AGENTS FOR these SHREDDERS and are now prepared to receive orders. The great advantages to be derived from the use of the NATIONAL CANE

The large number of Planters using them in the United States, Cubs. Argentine Republic, Peru, Australia and elsewhere, bear witness to the above claim.

SHEEDDER are thoroughly established and acknowledged by Planters

The use of the SHEEDER very largely augments the quantity of cane the mill can grind (25 to 50%), also the extraction of juice (5 to 12%).

It is a great safeguard, making known at once the presence of any sieces of iron, stakes from cars, or anything which would be liable to damage the mill, and allowing ample time to remove same before damaging the mill. The SHREDDER is very strongly made, and from the manner of its operation it cuts or tears these pieces of wood or iron without often breaking the SHREDDER; and if anything breaks, it is simply some of the knives or cutters, which can be quickly and economically replaced. The SHREDDER, as its name indicates, tears the cane into shreds of varying lengths, perfectly opening it and allowing the mill to thoroughly press out the juices without requiring the immense extra power necessary to grind or crush the whole cane. The Shredder spreads the shredded cane uniformly and evenly to the mill rolls, and does away with the necessity of spreading the bagasse by hand between the mills, where regrinding is in use. No greater amount of boiler capacity is required to operate the Shredden than that which was sufficient for the mill, for the above reasons. We furnish full working

gineer to successfully install and start them. In ordering Shredders from us, please send small sketch, showing the diameter and width of the mill ro. 1 with which Shredder is to be connected. also the side (either right or left hand as you face the delivery side of the mill), upon which the mill engine is located, also the height from floor line to center of front mill roll shaft, and distance center this shaft to front end of bed plate.
